

## Wireless Solutions

Go wireless with your Credit Card & Loyalty Card Acceptance. WashCard Systems now offers a secure wireless option for locations that don't want to deal with long cable runs or limitations in conduit.

### How it works

WashCard Wireless communicates via an exterior grade access point that can be mounted outside near the wireless devices or indoors as it has a reach of up to 300 feet (that's as long as a football field from goal line to goal line!)

- Allows easy install of vacuum islands
- Retrofit existing meter boxes
- Accept credit cards through secure wireless connections
- Increase wash usage by rewarding customers with free vacuums
- Save time, money and aggravation by connecting vacuum islands wirelessly
